

ALLEGRO MX-1v

THE BEST JUKEBOX KEEPS GETTING BETTER

BUILT ON A NAME YOU CAN TRUST

The Allegro MX-1 took the award-winning Allegro brand to the next level, adding state-of-the-art sound and integrated, multi-zone amplification. It also introduced practical features such as transport handles, a smaller footprint, intuitive cabling connectivity and a rear-door service tray, all while requiring minimal operator management time.

NOW EVEN BETTER, THANKS TO YOU

The Allegro MX-1v is better than ever, with dozens of enhancements and new features. From a tilted display for easier viewing to a standard interior service light and integrated Digital Sound Processor, the new Allegro MX-1v is better than ever and will help you stay ahead of the curve for years to come.

FIND MUSIC FASTER AND EASIER

Before patrons can enjoy the best sounding jukebox in the industry they need to pick their favorite song. We've made that even easier with our new real-time recommendations. Recommendations appear throughout the patron's experience, while they are browsing albums and at the end of their session.

THE BEST SOUND

The Allegro MX-1v's computer is now equipped with a Digital Sound Processor which automatically optimizes the output curve of the Zone 1 amplifier.

This same amplifier is also used to power the TouchTunes PerformMax Quad Sound System, and up to ten PerformMax Quad Sound Systems can be daisy-chained off Zone 1 to fill even the largest locations with great sound.

THE PRE-EMINENT INTERACTIVE ENTERTAINMENT NETWORK

Captivating patrons. Redefining entertainment. Growing your business. We're TouchTunes Interactive Networks, the largest in-venue interactive entertainment network, providing music, games, media and new revenue opportunities to over 45,000 bars, restaurants and retail locations in North America.
